**OPEN YOUR DOOR  
WITH THE TOUCH  
OF YOUR FINGER**

**A smarter Door Lock with simple access control.**

The IONIC lock by Fullex-ai with timeless design enables simple access using a Smartphone App. The access logins can be easily managed via mobile phone. An additional feature of the app is the access protocol, in which you can see which users have opened the door.

With the integrated power supply and wireless charging, you can open and close the door using BT5 Bluetooth on your mobile phone. The simple and quick installation makes it ideal for factory fitting. You can register infinity number of door openings in the smartphone App and up to 1500 on the lock itself!

Due to the simple installation and the easy-to-use access control, the Ionic electronic lock by Fullex-ai is ideal for any domestic properties and social housing.

Quick and easy installation

User administration and logging via App

Fits every door

GB Granted patent and a European Patent Application

Unlocking via Bluetooth

Dedicated security escutcheon available

Comes with up to 10 year mechanical guarantee

**IMMEDIATE CONFIRMATION**  
**THE DOOR IS LOCKED**

**WIRELESS CHARGING**

**ULTRA SECURE**

**BLUETOOTH COMMUNICATION**

The IONIC Electronic Lock by Fullex-ai is accessible using the Smartphone App which comes with a comprehensive user manual. The App is available to download from Google App Store or Apple Store. It is necessary to turn on the Bluetooth module to use the application. You must turn on the location service too on Android.

The IONIC Electronic Lock by Fullex-ai comes with a key fob which can be paired with the App for even easier door access.

## Technical Data

### Lock Size

- 45mm backset 1720 x 20 mm faceplate for timber, composite or aluminum doors

### Finish

- White, grey and polished chrome effect coming soon

### Access Control:

- Up to 16 normal users + admins
- Up to 16 key fobs
- Time-limited access: between two dates
- Recurring time intervals: 7 time intervals with week days

### Log:

- The lock itself can store maximum 1500 log events (lock, unlock, mains on/off, low battery)

### Settings:

- Auto locking delay
- Button mode (1 or 2 buttons)
- Beep volume change
- Lock name
- Lock firmware update: via Bluetooth directly from the App
- Communication: Bluetooth 5 Low Energy

### Power:

- Wireless (inductive) charger: 5VDC, charge distance max. 5mm
- USB charge: 5VDC
- Built-in battery: 500mAh Li-ion, 3.7V
- Power consumption: 4 mW on standby; 400 mW maximum
- Battery charge time: approx 12h (0 - 100%, from USB or inductive charger)
- Standby operation time without battery recharge present: 3-4 weeks

IONIC Electronic Door Lock by Fullex-ai with timeless design enables simple access using the Smartphone App. The access logins can be easily managed via mobile phone. An additional feature of the app is the access protocol, in which you can see which users have opened the door.

Download your IONIC Electronic Door Lock by Fullex-ai Smartphone App User Manual

## Opening

You can use an app, a fob, a push button on the inside, an override key or a thumb turn.

# MAKE IT YOUR OWN

## IONIC PACKS

# fullex<sup>®</sup> *Key Wind Lock*

## SINGLE DOORS

The Fullex Key Wind lock uses the key or the thumbturn to engage and retract the bolts and the latch. The Fullex Key Wind lock was developed to stop anyone getting in without a key when the door is closed. Our system uses the latch to do this. Once the door is closed you cannot move the latch unless you have a key. If a burglar tried to open the door, say for example if someone has entered the house with

shopping, then they cannot get in. The Fullex Key Wind Lock have minimum key turning with less than a half a turn.

The Fullex Key Wind Lock system offers low maintenance, economic cost and easy to use functionality.

### Technical Data

45mm backset  
3 dead bolts  
Reversible latch  
Cover plate 20mm wide, 1720mm long

### Top and Bottom Hook

Chrome plated steel top and bottom bolts

### Centre bolt

Stainless steel centre bolt

Based on the Fullex Crimebeater lock

Operated by thumbturn or key-key cylinder

Non-handed easily reversible latch

Designed for use with pull handles

Snib latch retention on face plate

Dedicated security escutcheon available

Comes with a 10 year guarantee

Ideal for doors with a pull handle

The best and most economical system, is having a package of Pull Handle, Key Wind Lock, High Security Escutcheon and 1 Star cylinder, and so we developed a matching escutcheon that fits the Key Wind Lock system.

# fullex<sup>®</sup> XL LOCKS

PVCu Doors

## SINGLE AND DOUBLE DOORS

XL is available in a range of lock configurations and can be used with either one piece or individual keep sets.

The XL's attractive silver finish is also corrosion resistant to neutral salt spray in excess of BS EN 1670 Grade 4, giving peace of mind to hard pressed fabricators and consumers.

One piece or individual keeps

3 opposing steel hooks and two steel anti-lift bolts

Two or four roller cams

Easily reversible latch as standard

Dual, single or split spindle options

Extendable top and bottom as standard

Latch hold back snib on lock faceplate

Comes with a 10 year guarantee

For use on PVCu doors

## Technical Data

### Corrosion Resistance

BS EN 1670 Grade 4 for 240 hours

### Cycle Operation

Cycle tested to 200,000 operations

## Materials

### Top and Bottom Hook

Chrome plated A3 hardened cast steel

### Anti Lift Bolts

Chrome plated A3 hardened cast steel

### Centre Hook

Dacromet coated A3 sintered steel

### Faceplate and Gearbox

Mild steel, zinc and clear passivated

### Roller Cams

Mild steel, zinc and clear passivated

For maximum security this lock can be used with the Kinetica K4 3 star BSI Kitemarked TS007 cylinder.

## Secured by Design

Police Preferred Specification

The XL was designed from the outset to offer maximum security and reliability. XL features three hooks, two steel anti-lift bolts and the option of either two or four roller cams for compression and smooth operation. Every XL lock is extendable top and bottom for

maximum flexibility and when combined with Fullex high security shoot bolts, the XL door system is fully capable of meeting PAS 24 requirements. The XL 3 hook also forms the heart of the CE marked XL Exodus Panic exit system and utilises the same lock preparation.

# fullex<sup>®</sup> XL 2+2

PVCu Doors

Aluminium  
Doors

## SINGLE AND DOUBLE DOORS

The XL 2+2 lock and keep were developed by Fullex specifically to suit the Profile 22 Optima system. Based on the successful dual spindle XL lock, which is a direct descendent of the highly regarded Crimebeater range, the XL 2+2 lock shares many components in its design, but adds additional locking elements.

Although similar to the standard XL lock, the XL 2+2 has no roller – compression is achieved by using larger top and bottom bolts to pull the door seals in. It features three opposing steel hooks and two compressing deep throw anti-lift bolts for smooth operation and security. PAS 24 performance on single, double and composite doors.

The one piece stainless steel keep has a completely non-handed design, suitable for PAS 24 testing and is pre-set with permanently attached Profile 22 Optima packers.

Completely non handed design

Suitable for PAS 24 testing

Stainless steel for high corrosion resistance

Pre set to suit profile

Brushed stainless steel finish as specified

Low resistance nylon inserts on keep pockets

Cam adjustment for ease of fitting

3 opposing hooks and 2 compressing deep throw anti-lift bolts

Easily reversible latch with latch snib

Dual spindle

# fullex<sup>®</sup> *DIRECT FIX TIMBER DOUBLE DOOR LOCK*

The Direct Fix Double Door lock is based on the 220 Pro lock mounted on a 16mm full height cover plate for the master door, the slave door side is also based on the 220 Pro centre case in a

simplified version with keep adjustment incorporated onto the faceplate. The lock is made to fit directly into the edges of a over-rebated double door set.

Deadbolt throws when the handle is lifted

2 opposing steel hooks, deadbolt and latch

Inline split spindle lock

Easily reversible latch

Includes latch hold back snib on lock faceplate

2200mm X 16mm square ends

Composite and timber over rebated double doors

Comes with a 10 year guarantee

Keeps are integrated into the slave door lock face plate

Comes with an anti-drill plate for extra security

**Secured by Design**

Police Preferred Specification

For maximum security the Timber Double Door Lock can be used with the Kinetica 3 star BSI Kitemarked TS007 cylinder.

# fullex<sup>®</sup> *GEMINI DOUBLE*

## DOUBLE AND STABLE DOORS

With a range of hardware and attractively finished extrusions available for 44mm composite doors and with a direct fit option for Timber doors, Fullex Gemini is adaptable and secure.

# fullex<sup>®</sup> PATIO LOCK

## PATIO AND SLIDING DOORS

Fullex Patio Door Lock has been designed to offer high security and long term reliability. It is available in 2 versions: 1414mm 6 hook and 1753mm 8 hook. They are suitable for all major PVCu profiles and boast exceptional security as well as durability.

Each Patio Door Lock has been manufactured using Austenitic stainless steel, offering maximum corrosion resistance and creating a long lasting, durable product.

As with all Fullex Locks, the Patio Door Lock is both Secured by Design licenced and PAS 24 tested.

### Secured by Design

Police Preferred Specification

Whether you choose the 6 or 8 hook option, all hooks are opposing which makes it extremely difficult to lift them out. There is also a central anti-lift bolt to make this even more challenging.

On either Patio Lock, there is the option to add shootbolts at the top and the bottom. The shootbolts fire out securing the door further when it is locked.

Fullex Patio Locks have also been designed with an inclusive mishandling device. The device pushes in when the door is fully closed which then allows for the lock to be operated. This not only makes locking the door much smoother but also prevents damage to both the lock and the keep.

# fullex<sup>®</sup> SLAM SHUT AUTOLOCK

## SINGLE DOORS

Based on the popular Crimebeater lock. The Slam Shut Autolock has an actuator unit positioned between the centre case and the top bolt.

When the door is closed a trigger in the actuator is depressed by a strike plate fitted to the outer frame

which allows the actuator to drive the top and bottom bolts into their extended position. A single rotation of the key then locks the door.

Available in dual spindle for use with 92mm/92mm or 92mm/62mm long backplate handles and is supplied complete with strike plate.
